

Web Tracker Sebagai HoneyPot

oleh : Lirva32 *

Mungkin Anda sering mendengar istilah "Web Tracker" atau sebagian dari Anda belum pernah mendengarnya...????

Web Tracker adalah sebuah konsep pemantauan aktifitas terhadap situs yang Anda miliki. Web Tracker merupakan bagian kerja dari HoneyPot... yang juga merupakan "Madu" tapi tidak "Beracun". Dengan Web Tacker kegiatan terhadap aktifitas si Attacker bisa dipantau. Bener nih bisa dipantau....??? Yyyuupppp, don't worry.... Web Tracker akan memantau :

- Asal Situs sebelum Attacker masuk ke situs Anda
- IP Address si Attacker
- Negara asal si Attacker
- Tanggal dan Jam Attacker masuk ke situs Anda
- Blocking terhadap IP yang bermasalah (pernah melakukan attacking)
- Perintah2 yang dimasukkan di dalam url milik situs Anda
- Reporting yang bisa langsung dilihat

Bagaimana cara mendirikan Web Tracker ?

Santai saja bro.... tenang..... lirva32 tetap akan kasih tau bagaimana proses mendirikan Web Tracker dengan baik....

Ini adalah langkah2 mendirikan sebuah Web Tracker :

1. Kunjungi : www.statcounter.com

What is STATCOUNTER?

A free yet reliable [invisible web tracker](#), highly configurable [hit counter](#) and real-time detailed [web stats](#). Insert a simple piece of our code on your web page and you will be able to analyse and monitor all the visitors to your website in real-time!

2. Proses Registrasi

Get Started!

It's easy and free - just 4 simple steps:

- Register an account
- Create a Project
- Insert the code on your website
- Analyze your stats!

REGISTER NOW! >>

Account created! Now you need to choose your timezone and add a project.

Advertise Your Website

Congratulations! Your account has been created successfully!

Please select your timezone:

The next step toward tracking your visitors is to create a StatCounter Project for your website. A Project relates to one website - if you have multiple websites you can create a Project for each, and manage them all from your account. Click the button below to set your timezone and start creating a StatCounter Project:

PROCEED & ADD A PROJECT >>

If you don't wish to create a project now, you can simply log in again at a later time to continue the process.

Copyright 1999-2006 © StatCounter, All rights reserved. [Privacy Policy](#) | [Terms and Conditions](#)

 Add New StatCounter Project

What kind of StatCounter project do you need?

All the statistics tracked from your website are stored in a StatCounter Project. Different Projects will suit different needs and in the future we will have a few different types to offer. For the moment we have the tried and tested "Standard StatCounter Project" for use. We've selected this for you. The most important thing to remember is that in most circumstances the rule "One Website - One Project" applies.

STANDARD STATCOUNTER PROJECT	
Traffic Summary Location stats (Country/City/Region/ISP) Search Engine Keyword Analysis System Stats (browser/os/resolution) Visitor Path Reports Popular Pages Visible counter/Invisible tracking 100% Free!	<input checked="" type="radio"/>
ADVANCED STATCOUNTER PROJECT [IN DEVELOPMENT]	
Exit link tracking Download tracking Unlimited log sizes Upgrade Required Coming Soon!	<input type="radio"/>
E-COMMERCE STATCOUNTER PROJECT [IN DEVELOPMENT]	
Campaign Tracking Overture/Adwords Tracking Upgrade Required Coming Soon!	<input type="radio"/>
<input type="button" value="Next >"/>

Congratulations! Your Project has been created!

From now on when you log into StatCounter your Project for "Test Web Tracker Only... ;)" will be displayed on the "My Projects" page from where you can access all your statistics.

Although your new Project has been created, it is not yet collecting visitor data from your website. In order to start doing so you must configure and install the StatCounter Code on each webpage you want to track.

If you don't install the code on your site, we can't track your traffic! Most users will want to do this immediately. To do so, click the button below:

CONFIGURE & INSTALL CODE >>

If you don't wish to configure and install your code at this stage, you can do so later by logging in, and clicking on the wrench icon beside your project name.

Test Web Tracker Only... ;) StatCounter Code Setup Wizard

What kind of StatCounter Code do you need?

We provide a host of options for the code you use to track your stats. If you choose a visible counter you can customise the size, font, color, background color and many other options so that the counter blends seamlessly with your sites design.

VISIBLE COUNTER	
This code will place a small, customisable number on your pages indicating to you and your visitors how many people have visited each page. The counter's appearance can be adjusted using further options in this wizard. Example: 000000095	<input type="radio"/>
INVISIBLE COUNTER	
The code generated by this option will make the counter invisible, and no indication to your visitors as to how popular a particular page is.	<input type="checkbox"/>
VISIBLE COUNTER ON HOMEPAGE ONLY	
This option will generate two pieces of code - one for your homepage that will display the counter there, and one for your other pages which will make it invisible.	<input type="radio"/>
BUTTON ONLY	
This option will generate code that simply displays a StatCounter button - a great way to support the site! Example: 	<input type="radio"/>
Next >	

Note :

Jangan lupa... pilih invisible supaya Attacker tidak mengetahui proses tracking yang kita gunakan

Add New Standard StatCounter Project

Please fill in the following details about your website, then click the 'Next' button at the bottom of this page.

PROJECT SETTINGS	
Website Title	<input type="text" value="Test Web Tracker Only... ;)"/>
Website URL	<input type="text" value="http://www.lirva32.or.id"/>
Category	<input type="text" value="Science & Technology"/>
Timezone	<input type="text" value="GMT+7:00 Asia/Jakarta (WIT)"/>
Maximum Visit Length Used to calculate your unique and returning visitors from a cookie. If this amount of time or more has elapsed since a visitor last visited a page on your website, then that visitor is considered unique. We recommend setting it between 1 and 6 hours. We don't recommend setting it to 24 hours and above.	<input type="text" value="30 mins"/>
Log Size Resources are limited, so we can only keep a detailed log of your most recent visitors. Unless you upgrade your account the maximum log size you can have is 100.	<input type="text" value="100"/>
IP Blocking If you have a fixed ip address, you can specify to have this blocked, so you won't artificially inflate your own count. Put each IP address on a new line with no spaces if you want it blocked. Or empty the box if you want to count all your visits. Current IP address: 222.124.60.24	<input type="text"/>
NON-ADMIN USER ACCESS TO THIS PROJECT	
Public Stats Allow anyone to view your stats.	<input type="checkbox"/>
Next >	

Note : IP bias dilakukan utk saat2 nanti jika Attcaker sudah ketauan Ip nya...

PLEASE CHOOSE - USE FRAMES?	
Does your website use frames?	Yes, my website uses frames <input type="radio"/>
Most users do not have frames on their website.	No, my website does not use frames <input checked="" type="radio"/>
OPTIONAL - HTML ONLY COUNTER	
It is not recommended to choose this option as it will not be possible to record the referring link, page title and other information. Only choose this if you web host does not allow you to insert javascript into your webpage. We recommend you move to a web host that will give you proper access to your website.	<input type="checkbox"/>
OPTIONAL - W3C COMPLIANT	
Maintaining correct line breaks in your code are crucial if you want to use W3C valid HTML. If you are just worried about your counter working all the time then don't tick this box.	<input type="checkbox"/>
OPTIONAL - XHTML COMPLIANT	
99% of users will not need this option. Unless you are specifically familiar with XHTML code don't tick this option as you may get unintended validation errors.	<input type="checkbox"/>
If you are getting a pop up on your webpage about displaying insecure items with secure items you can use the secure tracking option. But please note this puts an extra strain on our server and if you receive a large number of secure hits we may need to get in contact to charge more.	<input type="checkbox"/>
If you wish you may disable the link back to StatCounter in your code - however we would really appreciate it if you left it in!	<input type="checkbox"/>
<input type="button" value=" < Back"/> <input type="button" value=" Next >"/>

Keyword Analysis (lirva) 31st July 2006

Current Log Usage: 100. Total Log Size: 100. [Increase your log size today!](#)

TIP Click the little drill down arrow next to each result to show the users that used this keyword to find your website.

Did you prefer the old keyword analysis? That's ok. We still have it, it's just called "recent keyword activity" now.

Num	Perc.	Search Term
▼ 3	42.86%	lirva
▼ 2	28.57%	lirva32
▼ 2	28.57%	samarindahack
7	100.00%	

Group all search engines together

How can the Keyword Analysis help me?

The keyword stats are king! Has your website got enough traffic? If not you better pay attention to the search engines and what keywords your visitors are using to find you, and what keywords potential visitors are using but not finding your website listed for yet.

▼ Drill down the data - show your visitors that found your website with this keyword!

Choosing the Best Keywords

Effective search engine optimization depends on choosing the best keywords and I recommend using a combination of the Google Keyword Analysis, the Overture Keyword

Recent Keyword Activity :

Digunakan untuk mengetahui Search Engine beserta Keyword yang dipergunakan oleh orang lain termasuk Attacker untuk mendapatkan situs yang kita miliki.

Display URL not Title

Click the magnifying glass on each line to learn more about that visitor!

How can the Recent Come From Activity help me?

This a great way to see up to the second how the latest visitors to your website are finding your website excluding the search engines to find your website, and then magnify them to see

- selamat mencoba -
